DiscCrafting By LC logo

**What it does**

With this plugin, you can *craft* music discs!

Use blocks and minerals to make the music discs usually achieved from killing a creeper with a skeleton! Just use a crafting table!

**How to use**

Use Blocks of coal as if you were making a chest, but then put the item needed in the *center* to create the wanted disc. Example -

Crafting the WAIT disc

As you can see, *only* the material in the middle changes to craft the Disc!

**Permissions**

This plugin does **NOT** use permissions! Everyone can craft discs!

**Commands**

This plugin does **NOT** have any commands!

**Configuration**

This plugin does **NOT** have a configuration file!

**Coming Soon**

Coming soon will consist of;

-Crafting Recipe List -Update command or maybe an auto-updater
